VS
19.2.15

Mrs I think a definite understanding and a fixing of responsibility is very necessary. I beg to make the following proposals

I. A Consolidated register will be maintained in Branch V of all the Subjects

NOTE—Contn. sheet.

GPB—25,000—2-11-14

General and Revenue Secretariat. | File No. of 191 .

Serial No.

dealt with in the Jour notes in the form already proposed by me and approved by the Dy: Secretary.

II. With the aid of this register the Branch will watch the disposal of the several Cases in a general way, and put up quarterly reviews of progress achieved. Soon after the Deputy Commissioner's reports are received.

III. The Dy: Commissioner's reports will be referred in the first instance to Br: V, and be abstracted in the Column provided for the purpose in the Register referred to in I.

The responsibility for seeing that the quarterly reports are received on the due date, and that they are complete will devolve on Br V. If necessary reminders will also be issued from Br V.

IV. The Register will then be circulated to the several Branches for making remarks which will be have reference mainly to the stage of progress attained in the disposal of the several questions so far as Govt: is concerned i.e to say the Branches will note if any Cabinet Note of

NOTE—Contn. sheet.

any of the questions have been disposed of, if so the number & date of the G.O, if not, when it is expected to be disposed of, what difficulties exist in the way of Early disposal etc.

V. The work responsibility for working up the Cases questions according to the requirements of Each Case and seeing that they are brought to some finality will devolve on the Branches Concerned. If it is necessary for this purpose to call for any reports or to issue reminders, they will be expected to do the same and not Branch V.

VI. For the purpose of doing the work referred to above in V efficiently Each branch will maintain a separate list of all Subjects pertaining to it, and make notes in own notes. As the Concerned files will be in the Branch, no elaborate registers or notes would be necessary.

VII. The present practice of making notes on files like the present, which will involve the repetition of the names of the Subjects & other particulars every quarter will be discontinued. The necessary notes will be made in the Consolidated Register referred to in I. This will help us to

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE,
GENERAL AND REVENUE SECRETARIAT.

OFFICIAL MEMORANDUM.

No. G. 288-334—G. M. 90-14-1, DATED BANGALORE, 10TH JULY 1914.

The accompanying notes of the Dewan's tour through the taluks of Seringapatam (including the French Rocks Sub-Taluk), Krishnarajapet, Nagamangala, Mandya, Malavalli and Mysore in the Mysore District, are forwarded to the Heads of Departments and the Deputy Commissioner of the Mysore District, for information and favour of necessary action.

2. It is suggested that the questions raised be divided into:—

(1) subjects to be dealt with by the Deputy Commissioner himself (the more important questions, numbering perhaps not more than a dozen, may be reserved for personal attention by the Deputy Commissioner);

(2) subjects concerning departments other than the revenue; and

(3) subjects to be dealt with by the Revenue Sub-Division Officer and the Amildar.

3. Questions, in which Heads of Departments are concerned, may be dealt with in direct correspondence with them and the result reported. Whenever the Head of a Department takes over the entire responsibility for dealing with a question in direct communication with Government within a reasonable time, a statement to that effect may be obtained by the Deputy Commissioner and submitted to Government and the item struck off the Deputy Commissioner's list. The Deputy Commissioner, as the head of the District Administration, will be responsible for arranging that questions pertaining to all departments of Government in his District are settled finally within a reasonable time.

4. These suggestions are made with a view to fix the responsibility so that every one of the subjects may receive adequate attention commensurate with its importance and be pursued to a final stage and an order of disposal placed on record.

5. Copies of lists, showing the division of subjects in accordance with paragraph 2 above, may be prepared and furnished for the information of Government and a quarterly report of progress submitted until every one of them is dealt with finally. The first quarterly report will be due on 1st October 1914.

By Order,
D. M. NARASINGA RAO,
Offg. Secy. to Govt., Gen. & Rev. Depts.

To—The Heads of Departments.
The Deputy Commissioners of Districts.
The Secretaries to Government in other Departments.

95. Opening Vydyasalas at Yelwal and Chattanahalli.

96. Restoration of the Hinkal Tank.

for Deputy Commissioner,
Mysore District.

Report on the Progress made during the quarters ending 31st December 1914 and 31st March 1915 in the disposal of subjects referred to in the notes of inspection by the Dewan during his 2nd Tour in the Mysore District in the month of April 1914.

Vide Sperate list attached.

Serial No. PARTICULAR OF PROGRESS

SERINGAPATAM TALUK

1 (1) In this connection Government have sanctioned Rs 5000 in their order No 8001-4/Ml.355-10-9 dated 30-4-12 and out of the amount Rs 2300 are stated to have been spent for clearing rank vegetation, demolishing delapidated houses etc. during 1912-13 and the President of the Municipal Council states that the remaining work will be attended to soon.

(ii) The Sub Division Officer reports that Bangaradoddi Channel irrigates the Island, that this like other river channels is under the control of the Revenue authorities only during cultivating season and at other times under the D.P.W. The ryots complain that hot weather supply is insufficient. A reference will be made to the Executive Engineer for needful.

(iii) The President of the Seringapatam Municipality expects that by improving the Sanitation of the Town as in (1) (supra) this disease will be prevented.

2. Nothing can be done now. Vide reply in the progress report for the quarter ending 30th September 1914.

3. Nothing can be done now. Vide reply in the progress report for the previous quarter.

4. The Sub Division Officer reports that if this has to be achieved, Government may have to bear the heavy cost of compensation for acquiring wet lands which in this Taluk are very valuable, that most of the villages do not appear

to have been seriously affected by wet cultivation near them and that steps will be taken to prevent wet cultivation near villages which have been affected with Malaria.

5. As regards the Kirangur and Yeramane channels in this Taluk, the Amildar having reported that most of the ryots holding lands under the branch channels near the main channel were unwilling to pay any cess to keep the channel in good repair or to do the maintenance work and that a few whose lands are situated far away and receive scanty supply are willing to pay the cess, it has been recently ordered that action should be taken in accordance with G.O. No R. 9713-22/R.M.238-03 dated 19-1-1906 according to which the cess may be recovered from those who are willing to pay the same and that as regards others notices should be issued calling upon them to do their portion of work and warning them that on their failure, work will be carried out by Government and cost recovered from them.

6. This subject was often urged in the Representative Assembly and was withdrawn in the year 1913-14.

7. The executive Engineer having required money for preliminary survey etc, the District Board have sanctioned a sum of Rs 70 for the purpose and the estimate is awaited from him.

10. This also formed a subject of representation in the Dasara Representative Assembly. There being no unoccupied lands assessed or unassessed available near by to be set apart as gomal, Government have recently ordered that the prayer cannot be sanctioned vide G.O. No. R 6412-L-R 596-12-6 dated 27.1.915.

11. (1) As regards the supply of wood at favourable rates, the District Forest Officer who was consulted in the matter states that the market rates of timber are fast on the increas and teak logs cannot be sold at concession rates to persons starting small industries, that the required quantity of wood may conveniently be purchased by them at the periodical auctio sales held at Mysore and Nanjangud, where inferior and defective logs which only are required for the purpose can be had

42

at favourable rates. I agree with them.

(2) As regards a site for locating a rice mill, a site near the Fort has been recommended by the Sub Division Officer. The matter is under consideration. It is reported that another rice mill is proposed to be started by some persons who have formed themselves into a company and have purchased a private site behind the Police Station in Ganjam.

It is reported that there is no likelihood in the immediate future of a cart factory being established on a large scale.

12. This has been brought into force in Seringapatam Municipality.

14. (2) The porposal to transfer the Police out-post at Mandya koppal to Arakere is under correspondence.

(3) For the improvement of Tyarankatte, an estimate was first prepared for Rs 1710 including the ryots' share of work viz. Rs 770. The estimate was then returned by Government for being scrutinized by D.P.W and a fresh estimate for Rs 671 for the Government share of work has since been submitted to Government for sanction vide letter No 826 dated 20-4-1915.

15. Vide progress report for the previous quarter.

16. The Executive Engineer was requested to get up an estimate for the work. As the estimate for Rs 2572 received with his docket No 235 dated 23-9-14 was for improving the road from Yelekere to Haravu, he was requested in this Office letter No 172 dated 22-10-14 to furnish an estimate for the road from Kyatanahalli to Haravu and his reply to this last reference is awaited. The people of Haravu have agreed to pay a contribution of one rupee per kula and the Sub Division Officer has been requested to arrange for a similar contribution if possible from the people of Kyatanahalli. The Government have declined to contribute any sum from the budget of the Industires and Commerce Committee.

17. The Sub Division Officer reports that the tank is a breached one and required more than Rs 10000 for its res-

restoration, that the ryots of the village and those of the neighbouring villages are not willing to contribute towards the cost of restoration though they state that nearly 300 acres of dry land is likely to become irrigable thereby.

18. No intimation received from the Chief Engineer in Mysore.

19. It is reported that the following well-works etc have been undertaken under the village Improvement Scheme.

(1) A well was repaired at Baburayanakoppal at a cost of Rs 100.

(2) The villagers of Mallankoppal Kyatanhalli Hobli, have agreed to sink a well at a cost of Rs 400 by contributing half of it in labour and the work is in progress.

(3) The villagers of Kodyala, Arakere Hobli have agreed to sink a well in the village at a cost of Rs 800 by contributing half in labour.

(4) The villagers of Gobragala, Arakere Hobli have deposited Rs 50 for repairing a drinking water pond at a cost of Rs 100 and the work is in progress.

(5) The ryots of Kudlukuppe, Kyathanahalli Hobli have contributed Rs 111 to sink a well at a cost of Rs 260 and the balance of their share is being collected.

21. The Sub Division Officer states that the draft instruction, have been prepared by the Amildar and the same will be obtained and submitted for approval.

FRENCH ROCKS SUB TALUK

22 The Deputy Amildar having submitted estimates for wells in (1) Narayanapura (2) Bolenahalli (3) Balaghatta(4)Suggonahalli (5) Sangapura and (6) Dyavarhalli villages for sanction from the District Funds, they were all returned to him with a direction to take them up under the village Improvement scheme. Accordingly wells have been sunk in Balagutta, Narayanapura, and Suggonahalli, the 1st one under the Village Improvement Seheme and the latter two from Special Funds.

23 The Deputy Amildar reports that the ryots have been advised in the matter.

24. Vide Progress report for the previous quarter.

25. Vide progress report for the previous quarter. This also formed the subject of a Representation in the Dasara Representative Assembly, vide No 742 of 1913. A report has since been submitted to Government in letter No 786 dated 13-4-15 that Melkote Town cannot be improved until the Govt. graciously sanction a large grant from Provincial Funds for the purpose.

26. Vide Progress Report for the previous quarter. The Nirgantis are stated to have been enjoying the right for a long time and the matter is still under enquiry.

27. The resolution of the French Rocks Municipal Board passed by them at their meeting in November 1913 that Harohalli might be included within Municipal limits was not approved of, the village being ~~for~~ far away from the town.

28. No intimation received from the Chief Engineer.

29. Do

30. The Deputy Amildar reports that an estimate is under preparation and will be taken up under the Village Improvement Scheme.

31 --

32 A declaration statement has since been submitted to the Revenue Commissioner with No 1175 dated 24-4-15 for the acquisition of lands in view to shift the existing village thereto.

33. --

KRISHNARAJPET TALUK

34 --

35 --

36 --

37 --

38 --

39 --

NAGAMANGALA TALUK

40 No intimation received from the Chief Engineer.

41 --

42 No intimation received from the Chief Engineer.

43 After the Cooperative Society Conference was held in November 1914, fresh societies were formed in the following places viz. Bandiganavle, Bellur, Honnenhalli and Chnya and they are reported to be working satisfactorily. A society at Devalapura has just been registered.

44. The Sub Division Officer reports that most of these wells have been cleared and kept in good condition.

45 The Amildar reports that there are two kinds of silt, one sweet and the other bitter and that the ryots having been using the former as manure for their fields and that the latter is not so used.

46 No intimation received from the Chief Engineer.

47 Vide reply in the Progress Report for the previous quarter. As it has been decided that the Brahmin Pujari cannot be removed, notices is reported to have been issued to the Baravarddar Pujari at Kunigal to report himself for duty and action will be taken for the appointment of two fresh - Dharmadarsees.

48 It is reported that at present the cart track between the places has been improved and that road formation will be commenced as soon as the raims set in.

49 No intimation received from the Inspector General of Education.

50 --

51 No intimation received from the Chief Engineer.

52 Do

53 An Estimate for Rs 1958 received from the Amildar has been sent to the Executive Engineer for scrutiny. The ryots are stated to have done earth work to the extent of Rs 150 and are not willing to pay 1/3 of the estimated cost as per recent rules and that most of the land-holders under this tank are Inamdars residing outside in several places and consequently

46

there has been delay .

54 --

55 (1) The devotees want the temple compound wall to be got repaired, one third of the estimated cost viz. Rs 441 being paid by them and the rest being borne by Government. An Estimate has since been received from the Sub Division Officer.

(2) The Dharmadarsees want some lands under the Kote-en betta tank to be given to the temple for the maintance of the temple and conduct of servies therein. The lands applied for by them not being available they have been informed to select other lands.

56 No intimation received from the Chief Engineer.

57 Do

58 Do

59 This work has been included in the list of Famine Relief Works. The Sub Division Officer reports that the villagers of Sivahalli and Dudda have promised to do the earth work etc for the road as far as their village boundaries and that this work will be taken during the ensuing ~~reason~~ raing season.

60 Disposed of. Vide reply in the progress report for the previous quarter.

61 No information received from the Inspector General of Education.

62. (2) The District Forest Officer who was consulted in the matter states that the Forests that supply timber to the Nanjangud Depôt and Mysorewood-yard are far away from Mysore, that it will not be remunerative to open a Depôt at Mandya and that the people of Mandya may easily buy their requirements at Mysore or Nanjangud during the periodical aution sales. I am also of the same opinion.

63 There is no necessity for the establishment of these.

64 No intimation received from the D. G. of Education

65 -- Ditto -

85 Government in their No 3025-7 datdd 9-1-1908 sanctioned the estimate for Rs 8569 for repairing the main temple of Sri Narasimhaswamy at Marehalli, the devotees agreeing to contribute ¼ of the said amount. Again, in their Govt order No 4151-2

dated 24-3-08 a supplemental estimate for Rs 660 for certain additional items of work to the said temple was sanctioned. The Executive Engineer after Executing the work to the extent of Rs 7812 having opined that the remaining work could not be carried out unless additional repairs were also sanctioned, a revised estimate for Rs 15392 was submitted to Government for sanction, the excess expenditure being recommended to be met from State grant. Government thereupon in their No 3256-8/Mz. 601-10-2 dated 28-6-11 observed that as Government had already sanctioned a large sum of Rs 7721 as compared with Rs 1508 paid by the Devotees, no more funds could be spared from State Grant, and further ordered that if no more contributions could be levied from the devotees, the work must be completed within the sanctioned estimate with such alterations as were necessary to leave it at a satisfactory stage. As it was reported that the devotees were not willing to contribute any additional sum , the Executive Engineer was requested to close the work.

86 --

87 --

MYSORE TALUK

88 No intimation received from the Chief Engineer.

89 Do

90 Vide reply in the Progress report for the previous quarter. The opinion of the Taluk Board has been called for and is awaited.

91. An estimate for the construction of a Musafirkhana has recently been sanctioned by Government and a site plan submitted to Government for approval.

92. The Sub Division Officer reports that an estimate is under preparation.

93 --

94 The Sub Division Officer reports that the matter

117

is under investigation by the Amildar.

95 The resolution of the Taluk Board has been received and will be placed before the District Board at its next meeting.

96. The Sub Division Officer, Mysore, reports that the restoration of this tank will affect the supply of water to the Kukkarahalli tank very appreciably. The feeder channel to the latter passes through the former and that the Executive Engineer, it is understood , is also not in favour of restoring Hinkal Tank.

(7) The Chief Engineer writes that orders have been issued for tracing out this road.

(8) The Chief Engineer writes that a large project for closing the verandah with teakwood and glazed shutters to preserve the paintings and walls have been submitted.

(11) Vide Progress Report for the previous quarter.

(16) Vide Progress Report of the previous quarter.

There is already a cart- track and a bridge is wanted and the estimate is ready.

(17) The Chief Engineer writes that this will be inspected by the Superintending Engineer and reported on hereafter.

(18) The Chief Engineer says that the Superintending Engineer has promised to send estimates shortly.

(25) Vide Progress Report for the previous quarters.

(26) — Do —

(28) The Chief Engineer writes that all sources of supply have been investigated and the Reservoir at Gangavadi decided on and adds that a further communication will be sent ~~submitted~~.

(29) The Chief Engineer has communicated to the Superintending Engineer's Note that this will be reported on hereafter.

56

(34) The Chief Engineer writes that this will be taken up when time permits.

(37) The Amildar reports that ~~time~~ this has been engaging the attention of some leading men of the place.

(40) The Chief Engineer writes that this is in the Tumkur Division.

(42) The Chief Engineer writes that a reservoir at Gangavadi has been sanctioned and is borne all the famine list.

(44) The Amildar reports that all the road side wells have been cleaned and kept in good condition.

(45) The Amildar reports that the ryots of Sakkahally, Karadia, Nagamangala and other villages have removed silt to their lands.

(46) The Chief Engineer says that this appears impracticable and adds that the Superintending Engineer has promised a further ~~ther~~ report.

(47) The Amildar reports that the notice has been duly served on the pujari to report himself for duty and attend to the temple services, and that he has not yet turned up. The appointment of Dharmadarsis is under correspondence.

(48) The Superintending Engineer says in the statement forwarded by the Executive Engineer that this will be taken up if the Deputy Commissioner recommends its necessity. The subject is referred to the Taluk Board for opinion.

(49) No information received from the Inspector General of Education.

(51) The Chief Engineer intimates that the Sub Division Officer has been ordered to report on this.

57

(52) The Chief Engineer intimates that the P. W. D. Sub Division Officer has reported on this to the Superintending Engineer whose report in the matter after inspection is awaited.

(53) The ~~Executive~~ Chief Engineer has intimated that the Superintending Engineer's report after his inspection is awaited.

(54) — Do —

(55) (i) The Amildar reports that the Sanitary Inspector writes that the Dharmadarsis have done the work of repairs to the extent of Rs.50/-.

(ii) The Dharmadarsis have asked for 4 or 5 acres of land out of survey Nos. 175, 176 and 177 of the Kotebetta village and this application has been referred to the Amildar for full and detail report early.

(56) The Chief Engineer writes that this will be investigated.

(57) The Chief Engineer writes that this was investigated and the proposals were abandoned so far back as 13-12-19½ as it will submerge a large extent of cultivated lands and that no increase in the cultivation is expected under this tank.

(58) The Chief Engineer says that project for raising the ~~tne~~ weir will be prepared.

(59) The Chief Engineer writes that this will be investigated.

(61) No information received from the Inspector General of Education.

(64) — Do —

(65) — Do —

(66) Arrangements are being made to start a Society. A site is reported to have been selected for the ~~location~~ location of the Industrial School and the matter is under correspondence with the Sub Division Officer, French Rocks Sub Division.

(67) No information is received from the Inspector General of Education.

(68) The land is reported to have been taken possession of by the Members of the Co-operative Society of the place.

(69) No information is received from the Inspector General of Education.

(70) The Chief Engineer writes that this will be investigated.

(71) The Chief Engineer says that this will be investigated in communication with the undersigned.

(72) No information received from the Chief Engineer.

(73) The Chief Engineer writes that the submission of a report by the Superintending Engineer is awaited.

(74) The Chief Engineer intimates that the kodi of this tank has recently been raised one foot and that no further raising is necessary.

(76) The Chief Engineer writes that this will be investigated hereafter.

(77) — Do —

(78) The Chief Engineer writes that the project is under preparation as ordered in his No. 7762 dated 14-8-1911.

(83) The Chief Engineer writes that this will be investigated.

(87) The Chief Engineer writes that this will be investigated this season.

(88) The Chief Engineer has communicated the Superintending Engineer's note that the idea is novel, and that the southern channel from the Cauvery Reservoir would answer the purpose better.

(89) The Chief Engineer says that this project is with the Superintending Engineer, Cauvery Reservoir Works.

(92) The Chief Engineer writes that an estimate is ordered for this.

NOTES OF THE DEWAN'S TOUR IN THE MYSORE DISTRICT.

1st April 1914.

SERINGAPATAM TALUK.

1. Physical Features and General Condition.

The island of Seringapatam covers an area of about 4·5 square miles.

The Cauvery river and channels pass through this taluk and nearly two-fifths of the cultivated area is watered by them. Much of the fertility of wet cultivation seems to be due to the silt carried to the fields by the river water.

The town and island of Seringapatam are unhealthy and the population is dwindling. Many houses are said to be untenanted. Recently steps have been taken to remove some of the causes of malaria and further measures in the same direction are necessary. A sugar factory for the manufacture of jaggery and sugar by improved methods started at Haravu by the Department of Industries and Commerce is working satisfactorily although the supply of cane seems insufficient. The question of developing sugar-cane cultivation is under the consideration of the Public Works Department in connection with the Kannambadi Reservoir Scheme.

2. Major Wants.

(1) The most important wants of this taluk seem to be (i) the improvement of the town of Seringapatam, (ii) the control and distribution of irrigation water, and (iii) the eradication of malaria.

(2) A good water-supply for the town of Seringapatam is an urgent necessity. Government might be able to contribute half the cost of a water-supply scheme if the townspeople come forward to meet the other half and to provide the money for the annual maintenance. It might be possible to devise a cheaper scheme than the one already prepared to supply potable water to Ganjam and the main town.

(3) The improvement of drainage of the town should be taken in hand as soon as a water-supply scheme is carried out.

(4) Irrigation is practised too close to the villages which suffer from malaria on that account. A strip or margin of dry land should separate them.

(5) There were complaints that the distribution of water from branch channels of the Cauvery system is very irregular. Many cultivators seem to be willing to pay a rate of annas eight per acre in order to be relieved of the responsibility of maintaining the channels. A local committee should be formed to investigate the question. Later on it may be possible to entrust the management of the channels to a Committee who might collect a local cess and do the work themselves with the professional help of the Public Works Department.

3. Minor Wants and Individual Complaints.

(1) In view of the unhealthiness of the island it has been suggested that wet cultivation within the island should be stopped or the land revenue of the irrigated area handed over to the Municipality.

(2) A road is required from Mandyakoppal to Kottatti in Mandya Taluk. The people interested seem to be willing to contribute a part of the cost.

(3) The Public Works Department should attend to the permanent preservation of paintings on the walls of the Daria Dowlat building in Seringapatam.

(4) The building over the tomb of Tippu Sultan at Seringapatam should be kept in proper repair at all times, instead of attempting the repairs by fits and starts on the occasion of the visits of distinguished personages.

(5) The raiyats of Seringapatam asked for the grant of *gomal* land for their use. The question needs investigation.

(6) The people of Seringapatam want certain facilities for developing industries. These are (i) a site for a rice mill and a cart factory and (ii) supply of wood (including teak) at favourable rates.

(7) They also asked for compulsory education, some people expressing their willingness to pay four annas per boy attending the school.

(8) There are 250 looms at present in the Kodiyal village and the weavers there want instruction in the use of fly-shuttle looms.

(9) The villagers of Arakere wanted a Dispensary and a Police Station and also asked for the improvement of their water supply.

(10) The people of Ganjam wanted an Industrial School.

(11) A road seems to be required from Kyatanhalli to Haravu.

(12) The restoration of the Ganangur tank has been suggested.

(13) A compound wall or fence is required for the Dispensary and for the Travellers' Bungalow at Seringapatam.

(14) Several villages asked for help for improving their water supply. This may be attended to under the Village Improvement Scheme.

(15) It would be well to utilise the Gumbaz funds (of which there is said to be a balance of Rs. 59,000) to improve the Mahommedan Boys' School, start a Mahommedan Girls' School and to provide scholarships for Mahommedan boys among whom education is in a backward state.

4. General Remarks.

A statement of duties of the members of the establishment employed on the Gumbaz should be prepared and, after approval, printed and issued for daily use.

The records at the Taluk Office have been tidied up recently through the exertions of the Deputy Commissioner. The arrears pending with the Shekdars are large.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.

NOTES OF THE DEWAN'S TOUR IN THE MYSORE DISTRICT.

6th April 1914.

FRENCH ROCKS SUB-TALUK.

1. Physical Features and General Condition.

In this Sub-Taluk are situated the Melkote temple, an old and important shrine, and the Mothi Talav, a big tank constructed by Tippu Sultan.

The taluk suffers from short rainfall and deficient water-supply.

Very good silk and cotton cloths are prepared at Melkote. The town seems to have suffered much from plague.

2. Major Wants.

(1) Many villages in the sub-taluk are said to be in need of a good drinking water-supply. The real difficulty seems to be lack of subsoil storage.

(2) People should be encouraged to store water in tanks in order to replenish the wells.

(3) Money help was asked for for several institutions at Melkote, such as the Sanskrit College and the Industrial School. The ladies' embroidery section of the latter was specially worthy of notice.

The important wants of Melkote seem to be a good water-supply and drainage. The municipal resources should be developed to find money for these works. It may be possible to raise a contribution from the large number of pilgrims who visit the shrine. Existing arrangements for the disposal of sewage seem to be very unsatisfactory. All the improvements needed should be thoroughly considered and definite proposals submitted by the Sub-Division Officer under the orders of the Deputy Commissioner within six months.

3. Minor Wants and Individual Complaints.

(1) The cultivators under the Hirode tank represented that although they paid the cost of the repairs to the tank, the right of fishing therein was given to Nirgantis instead of to them. They pray that the fishing rights may be transferred to them.

(2) The people of Hirode suggested the inclusion of Harohalli within the French Rocks Municipality. The proposal seems *prima facie* unfair to the smaller village.

(3) The water-supply of the Mothi Talav tank is reported to be insufficient. The question whether any works can be carried out to divert new sources of supply should be investigated.

(4) The people of Kurubar Bettahalli want a well, which the Deputy Commissioner has promised to arrange for.

(5) A Primary School was promised for four villages with Nyamanhalli as centre.

(6) *Tirumalasagar Chattram.*—The villagers want to improve the village which is in a decadent condition and to rebuild it if possible with a new name. They want new land from Government for the purpose. The Deputy Commissioner has agreed to investigate the want and if possible to meet it by suitable concessions.

4. General Remarks.

The records at the Taluk Cutchery have yet to be sorted. The Sub-Division Officer will prepare a list of all incomplete work and fix a date for completion. A monthly report of progress should be maintained in a book form in the Deputy Amildar's Office and it should be periodically examined and signed by the Sub-Division Officer.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.

NOTES OF THE DEWAN'S TOUR IN THE MYSORE DISTRICT.

3rd April 1914.

KRISHNARAJPETE TALUK.

1. Physical Features and General Condition.

There is a large number of major tanks in this taluk with a considerable area of rice cultivation under them, as well as under the river channels in the northern parts of the taluk. The taluk is healthy in spite of its extensive irrigation.

The people of this taluk seem to be industrious and enterprising. Some 300 of them have migrated to Bombay where several of them are said to have taken up employment as carriage drivers.

The principal industries of the taluk are weaving, cattle-rearing, silk-dyeing and pottery.

The villages of Hosa Holalu, Kikkeri and Sindhaghatta are flourishing on account of the prosperous condition of the weaving industry. Silk dyeing is practised at Sindhaghatta.

There are three aided English Schools in the taluk. 1·8 per cent of the entire population are at school. The people expressed a desire for the introduction of compulsory education.

Representations were received for increased irrigation facilities by the extension of river channels.

Agriculture and irrigation are capable of great improvement in this taluk, particularly as people are active and enterprising.

2. Major Wants.

(1) A bridge is required on the Hemavati between Krishnarajpet and Akki Hebbal.

(2) Facilities were applied for, for special or technical education in agriculture, weaving and dyeing.

3. Minor Wants and Individual Complaints.

(1) An Industrial School was asked for for Hosa Holalu. This is a large weaving centre with 120 looms. The request deserves consideration.

(2) The people wanted a small sugar factory like the one at Haravu established in this taluk.

(3) The people of Akki Hebbal want a Government English School and a building for the Kannada School. They have made some sacrifice already by contributing towards the cost of maintenance of an aided English School.

(4) The people of Sindhaghatta want an Anglo-Vernacular School and a Dyeing School for their village.

4. General Remarks.

The sorting of the records in the Taluk Office is making good progress although much yet remains to be done.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.

6th April 1914.

NAGAMANGALA TALUK.

1. Physical Features and General Condition.

This is the driest taluk in the Mysore District and, as in the case of Mandya, large numbers of people migrate annually in search of employment to the coffee estates on the Nilgiris. Many have left the taluk for good. The Honakere *hobli* of this taluk is badly subject to drought.

Cattle rearing is said to be an important occupation in the taluk.

There was at one time a large industry in metal work which is said to be dying out, there being now only five or six surviving families skilled in such work.

A few cocoanut gardens are seen here and there in the valleys wherever there is moisture. Complaints are heard that tanks in the taluk have not filled in recent years. The restoration of minor tanks is the greatest want of the taluk at present. There is difficulty about water supply everywhere particularly this year.

2. Major Wants.

(1) Markonahalli tank project estimated to cost eight lakhs seems to be worth taking up.

(2) Great difficulty is experienced by the people of Nagamangala town for drinking water. The question needs special investigation. Government will be prepared to contribute half the cost of a water supply project if the Municipality is able to provide the other half as well as the maintenance charges.

(3) An anikat across the Lokapavani at Gangavadi has been suggested for feeding tanks. A preliminary report may be furnished on the proposal.

(4) There is only one Co-operative Society just started in the taluk. There seems to be scope for more.

(5) There is a large number of step wells on the road from Seringapatam to Nagamangala. The villagers concerned should be induced to clear them and keep them in repair.

(6) Silt is largely used as manure in this taluk. This practice which is largely followed in countries like Italy deserves to be encouraged everywhere.

3. Minor Wants and Individual Complaints.

(1) A feeder channel from the Hemavati to the Bindiganavale tank was asked for.

(2) The goldsmiths complained that *Pooja* is not regularly performed in the Kalikamba temple.

(3) A road was asked for from Koppa to Nagamangala *via* Bhimanahalli.

(4) The services of an English teacher for the school at Bellur were asked for.

(5) In Arakere tank, earthwork is said to have been completed, but stone work has not been done. The Deputy Commissioner will enquire into the matter and get the repairs completed.

(6) The tank at Gantihalli requires the attention of the Public Works Department.

(7) The new tank at Bhusandra is said to be silted. The complaint may be investigated with an eye to providing a remedy.

(8) The people of Maidahalli are willing to contribute towards the restoration of their tank.

(9) The people of Bombdihalli want a tank; they are willing to pay a contribution.

(10) The reasonable wants of the Kotibetta temple may be examined and, if possible, supplied.

(11) People want the *kodi* level of the Kadlageri tank to be raised.

4. General Remarks.

The records of the taluk are in a fair condition. The number of papers pending with the Shekdars is large.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.

NOTES OF THE DEWAN'S TOUR IN THE MYSORE DISTRICT.

4th April 1914.

MANDYA TALUK.

1. Physical Features and General Condition.

This taluk also depends for its prosperity chiefly on rainfall which is none too plentiful. Over a thousand people are said to have emigrated to coffee estates, Kannambadi works and the West Coast in search of employment. Weaving is largely practised among the Holeyas. Silk cocoons are produced in 99 villages in the Maddur and adjoining *hoblis*. Education in the town of Mandya is mainly in the hands of the Wesleyan Mission and there is great scope also for departmental action. The Panchamas of the taluk seem to be doing well on account of their education and the profits from the weaving industry in which they are employed.

2. Major Wants.

(1) It was suggested that the waters of the Lokapavani might be diverted and used for filling the Basaral and other irrigation tanks. The levels of the country should be examined to see if this is financially practicable.

(2) The Maddur tank is said to be silting up. The raising of the dam and weir was urged with a view to increase the capacity of the tank. The tank is said to dry up early in the season causing loss to the large area of mulberry depending on it.

(3) The Mandya tank has silted and the question whether anything can be done to increase its storage may be examined.

(4) A road from Mandyakoppal to Kottatti was asked for as in Seringapatam.

(5) A road from Sivahalli to Melkote seems desirable.

(6) A Flag Station seems to be needed at Nidaghatta, a silk centre.

(7) An Industrial School was asked for at Mandya and Maddur and Anglo-Vernacular Classes at Maddur. A weaving craft school is required for Satanur.

(8) A Veterinary Assistant was asked for, for the taluk to help in cattle rearing and also a forest wood yard, as great difficulty is said to be experienced in obtaining timber for the taluk.

(9) The townspeople of Maddur ask for a sub-taluk cutcherry and a Sub-Registrar's Office.

3. Minor Wants and Individual Complaints.

(1) There seems to be scope for a Girls' School for Holeyas in the town of Mandya. There is a good Girls' School conducted by the Wesleyan Mission.

(2) A Government Anglo-Vernacular School also seems a necessity.

(3) The Holeyas of Mandya asked for a Co-operative Society and an Industrial School.

(4) The Mahomedans asked for a Kannada Munshi for the Mahomedan School.

(5) A building is wanted for a Weaving School proposed to be started by the Panchama Co-operative Society at Kommerahalli. A sum of Rs. 500 has already been collected by the Society for this purpose.

(6) Sumadhalli wants a Government School. It has a population of 700.

(7) Madapur Doddi Tank requires to be restored. One Anugouda is willing to contribute Rs. 10,000.

(8) Works needed for improving the Vydyanathapur temple should be examined.

(9) The weir of the Basaral tank is said to require raising.

(10) The question whether the Inspection Lodge at Maddur should not be used for a school or other purpose should be considered and final orders issued in the Public Works Department.

(11) People have urged the raising of the Kodi of Hosakere tank.

4. General Remarks.

There are large arrears of revenue of previous years still outstanding.

The sorting of records in the Taluk Office is being attended to.

Mr. Sangappa of Mandya is setting a good example by building a chuttram for travellers close to the Mandya Railway Station.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.

NOTES OF THE DEWAN'S TOUR IN THE MYSORE DISTRICT.

7th April 1914.

MALAVALLI TALUK.

1. Physical Features and General Condition.

The taluk is traversed by the rivers Cauvery and Shimsha although only the former is utilized for irrigation. The average rainfall of the taluk is 27 inches; the actual fall in 1913 was only 23·5 inches.

Agriculture is the principal occupation of the people. Some Mahomedans are engaged in sericulture and silk cloths are also manufactured. Sixty or seventy families of *chucklers* support themselves by preparing native sandals.

The indigenous industry in iron smelting which once flourished in this taluk has now died out. There are rich deposits of iron ore near Halagur, which once gave employment to large numbers of people.

The Faith Mission maintain a well conducted orphanage.

2. Major Wants.

(1) Drinking water-supply is said to be insufficient or unsatisfactory in many villages such as Ragibommanahalli, Gowdagere, Hadli, etc.

(2) The improvement of the Malvalli tank was prayed for, as at present it does not supply sufficient water for irrigation.

(3) A bridge is wanted across the Shimsha near Banasamudra. It is stated that communication is interrupted for three or four days at a time.

(4) An anikat across Malavalli Kodi Halla was asked for, for the irrigation of lands in Nidaghatta and Gajanur. People are willing to contribute one-third of the cost.

(5) The extension of the north channel of the Sulekere tank into Chikkarasina Kere was asked for. The project seems to require attention.

3. Minor Wants and Individual Complaints.

(1) The townspeople of Malavalli want the Anglo-Vernacular School raised to a High School.

(2) The reservation of the Donagur State Forest is said to be causing trouble and annoyance to the villagers.

(3) An Hospital in the village of Halagur was asked for on account of the unhealthiness of the locality.

(4) The residents of Dalvoy Kodihalli asked for the construction of a reservoir across the Bhima river.

(5) An application was made for an English teacher for the Panchama School.

(6) Additional repairs to the Marehalli temple were asked for.

(7) Dodda Arasinkere with 400 houses has no Government School. People are willing to contribute towards the cost of a school.

(8) The people of Marakal want their wet lands converted into dry on account of insufficiency of water. The request should be investigated.

4. General Remarks.

The number of unanswered references with Shekdars is large. The taluk records are in an unsatisfactory state.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.

NOTES OF THE DEWAN'S TOUR IN THE MYSORE DISTRICT.

22nd April 1914.

MYSORE TALUK.

1. Physical Features and General Condition.

The population of the taluk is limited because the soil is poor and unproductive.

There are very few tanks. Small patches of land are irrigated from the tail distributaries of the Virijanadi and Devaraj channels drawn from the Cauvery, and the Rampur channel fed by the Kapini.

The people of the villages round about Mysore City find employment in ministering to the wants of the town population.

The people of the taluk stated that the rainfall has been short and ill-distributed and the produce from agriculture unsatisfactory for the past seven or eight years.

The industries practised in the taluk are Kambli-weaving and mat-making. A few persons are employed in making carts.

Towards Chettanhalli, the country is unhealthy on account of lantana and scrub jungle and there is a comparatively large area of assessed waste.

There are fourteen Government Schools and twenty-eight private schools and there is a general desire for vocational education. The people of Hinakal asked for the introduction of compulsory education.

2. Major Wants.

(1) The construction of a project for raising the Hulhalli anikat by about 20 feet to bring a channel at a sufficiently high level to command the southern portions of the taluk has been urged. This matter should be investigated.

(2) The extension of the Virijanadi channel to Megalpura, Puttegoudanhundi, etc., was asked for.

(3) Facilities for medical aid in the taluk are stated to be defective. A travelling dispensary may be serviceable.

3. Minor Wants and Individual Complaints.

(1) The construction of a Musafirkhana on the Chamundi Hill seems to be needed for the use of the people who visit the hill. If necessary, a reasonable charge may be made for the occupation of the Musafirkhana after one is constructed.

(2) The feeder to the Varuna tank is stated to require repairs.

(3) The small tank at Yelval seems to require repairs in order to supply water to the large number of travellers who camp at this village.

(4) The suggestion that a new site should be selected for Chettanhalli village may be investigated.

(5) The people of Yelwal and Chettanhalli want a Vaidyasala.

(6) The villagers of Hinakal prayed for the restoration of their tank.

4. General Remarks.

The Taluk Office seems to be on the whole in a satisfactory condition. The present Cutcherry building is ill-ventilated. More light and air should be provided by suitable additions and alterations to the building.

The records require attention. There is a large accumulation of unsorted papers.

The Excise Range Office was kept in a very untidy condition.

9th July 1914. M. V.

Statistical information furnished by Mr. A. Subrahmanya Iyer, B.A., Deputy Commissioner.
